A VALLEY IN AVILLON.

Hurt by love's darts I creep away
Far from the eyes and the haunts of men,
To vales where loving fancies stray.
O'erhung with blue, untouched with gray;
Where pain, nor troubles ever stay;
Nor, do I want to come again;
But lonely walk, for true love's sake,
With feet that never can forsake A Valley in Avillon.

Dear heart of mine—this boon I pray: Let not your soul forsake me, when, Back to the world so bright and gay, So full of laughter, life, and play You pass—and I have gone away. Remember, Sweet, that I'll be then Wandering drear, for true love's sake, With feet that never can forsake A Valley in Avillon.

Shall yearn for things beyond my ken— The white sail fluttering down the bay; Spring; and the blossoms of May— And backward, dear, my thoughts will stray To thee and our true love again. Yet shall I walk—for that love's sake With feet that never can formake A Valley in Avillon.

L'ENVOI

Dearest of mine, to whom I pray; Must I, indeed, fare forth alone; Just I—to seek the golden day? Ah, come with me. for true love's sake— Your feet, nor mine, shall e'er forsake That Valley in Avillon. -Mrs. Leslie Carter, in New York Star.

A LITTLE NONSENSE.

A GOOD BUSINESS. I'd like to own a street car line;

It ought to pay.
The people ride when it is fine To heat allay.
Of course, they ride when it is wet, For then they wish To quickly under shelter get;

And so a street care line, you see, May business find No matter what conditions be With human kind. Then to another point is my

It is going to be impossible to discuss the tariff bill intelligently until the clothes you are now wearing have to be replaced.

SHERLOCK HOLMES.

The Great Detective had returned; he'd been some years away, and I supposed that he was dead, and sleeping 'neath the clay. Ah, ne'er shall I forget the joy it gave me thus to greet the king of all detectives in my rooms in Baker street! "I notice, Watson," Sherlock said, with smile serene and wide, "that since I left you, months ago, you've found yourself a bride." I had not spoken of the fact, so how did Sherlock know? I tumbled from my rocking chair, his knowledge jarred me so. "It's easy, Watson," said the sleuth; "deduction makes it plain; you ate an egg for breakfast and your chin still wears the stain; you haven't shaved for half a week-the stubble's growing blue-your pants are baggy at the knees, your necktie's on askew; your vest is buttoned crooked and your shirt is out of plumb; your hat has been in contact with a wad of chewing gum. You were something of a dandy in the good old days of yore—pass the dope, my dearest Watson; what's the use of saying WALT MASON.

AT THE HOTELS.

Interest in the preservative treatment of timber to increase its length of life is developing at a rate throughout the Northwest States, according to P. L. Elliott, of Missoula, Mont., who is at the

Riggs, "A few years ago, when all kinds of wood were cheap and plentiful," comtinues Mr. Elliott, "people selected the kinds which were most durable and best that these 4,150 acres are in the midst of a big city. It is planned to make woman found that a pretty girl in a trim that the most valuable species are nowof a big city. It is planned to make shirt waist sitting at a typewriter was one adays comparatively scarce and high, water, 170 feet wide at its base, and of the most attractive things in the whole and the cost of wood has become a big seventy feet wide on top. The great cost exhibit of humanity, she took to the ma- item, particularly to farmers, railroads But if it is to be extraordinary in both light on the stage. In a season or two men controlling these industries naturalthe business world began to blossom as the rose. The typic arrange of reducing the cost of fence-posts, piling, the rose. The typist sprang up every- railroad ties, mine timbers, telephone and where, and the man who didn't have one telegraph poles, and other timbers likely in the front office felt like an old fogy on to decay, and making them last longer. The thought naturally occurred: If there cheap kinds of timber last longer, might help some. Various people got busy and worked out several different methods of treating timber, cheaper yet

effectively "Probably the United States government, through the Forest Service, has worked on this longer than any one else in this country. Now, the processes have been so well developed that the economy of timber is a sure thing. The life of almost thorough impregnation with creosote or zinc chloride. This alone means a great saving, both in the original cost of the timbers and in the labor of replacing them. But, better yet, cheap woods, when well treated, are just as good as the valuable and naturally durable kinds, and will last considerably longer than those which are naturally durable but un-

"The board of regents of the University of Kansas have voted to establish a new statistics. Every one around her was de- school at the university," said Dr. Fred voted to her, but she remained heart- S. Long, of Lawrence, Kans., at the Ralwhole and fancy-free until there came eigh, "to be known as the school of eduinto the office a tall young Hollander, He cation. This school will embrace all the knew little English and had much to activities of the university which have a

fu! business man. He could not forget work in pedagogy, which will be broadher pupil. So Cupid reached across 10,000 specting and regulating high schools and that bind lovers in happiness. The ro- R. Price, of Hutchinson, was recently Speaking of the Swedes as American

Most Formidable Enemy. From the Clereland Leader.

When a famous Nimrod goes from the White House to the wilds of Africa to White House to the wilds of Africa to The Sponsored by the caused more bad spelling, family disturb- not expect," continued the visitor. "Amerances, and marriages than any other in- ica itself is a land of culture, and the vention of modern times. It has scattered incoming Swede comes within the influnillions of letters, love stories, plays, and ence and activity of the American cul-"And on it ture, particularly for the reason that, Cupid sits and smiles, so wily, cute, and debonair; while the machine holds out to from the cultured classes in his home

"The improved condition he acquires in America places him in a position to give his children an education, but this education has its root in America, not lu Swedish culture. This is the law of conditions and progress. Education promotes, however, a demand for knowledge, We can hardly believe that the verdict To the extent the Swedish Americans acquire American culture it creates in them against a physician of that city because a desire to become acquainted with the he sewed up in a patient a roll of gauze, intellectual and culture association be-Swedish culture, and in this manner the

emigrated to acquire more and better land for his children. The political happenings of 1905 (Norway's separation from Sweden) assisted in stimulating the peopower and consideration. If these efforts also include a higher economic and com-

mercial development, the emigration problem will solve itself. "Sweden is a rich land with its mines, water powers, and forests. If foundation ment a bright future can be expected. All efforts to lift up Sweden will always receive the greatest sympathy from Swedish-Americans. With regard to the Swedes in America, we carry the honors of our forefathers best by acquiring such us a place in the foremost rank as Amer-

Before very long members of Congress everywhere will begin passing out their ment. A judicial interference with a census plums, according to Young S. Grifvested right of this kind would surely be fiths, a lawyer of New Orleans, who is at the National. "They will have a fine assortment to hand out to the faithful. It is planned to have one enumerator for each township in the country and ward

'The government census people, but also the gathering of statistics "It is reported that three of the stingi- of all kinds. The government will want

"The enumeration clerks, as well as suthe census bill this time. An effort was made by President Roosevelt to put the whole census field work under the regular civil service list. That would mean a tremendous increase in the government payroll permanently. Congress wouldn't stand for it, but compromised by fixing up a 'half baked' civil service scheme. Under the plan devised, the census officials in the field will have no claims or work under the government after their field work is completed."

"Turning pine barrens into gold is a science," said Benjamin K. George, of Cheboygan, Mich., at the Riggs yester-"An infant industry of a few years ago has developed into a great magical onversion of useless pine stumps into costly chemicals. Cheboygan soon is to feel the effect of this new occupation. There are 3,000,000 acres of pine stump land in Michigan. These vast lands are now worthless, a monument to the wastefulness of an obsolete industry. But each of these_3,000,000 acres will average fifteen cords of stumps to the acre. And each cord will give, through a newly found chemical process, liquids to the value of \$25.75. Such, at least, is maintained by the formers of a mammoth turpentine company to build a factory in Cheboygan. There are four turpentine stump plants in Michigan. From an agricultural point of view the results of the new industry will be far-reaching. Land worth from \$1 to \$3 an acre is cleared free of charge by the turpentine company. This clearing costs \$22.50 an acre, and cleared lands average in value \$15 per The industry is unique, in that the raw material costs the promoter nothing. Following the clearing of the waste land, clover is planted by the skilled farmer beans or peas are planted, and then the land is good for almost any growth suitable to the Michigan climate"
